DB 117493 [The Gordian protocol](#) by David Weber

"Doctor Benjamin Schröder was far from a man of action. In fact, he was a history teacher-Chairman of the Castle Rock University history department-and if his life wasn't perfect, it was close. Until, that is the discussion of his star student Elzbieta Abramowski's dissertation on Operation Oz, the Pacific Allies' invasion of Vladivostok, staged through occupied Japan to meet their Imperial German allies, was brutally interrupted. The psychotic episode that turned his entire world upside down struck with absolutely no warning, and it was more terrifying than anything he should have been able to imagine, leaving him with a complete, incredibly detailed set of false, nightmare memories. Not just of his own life, but of an entire,

ghastly world in which Operation Oz had never happened. In which millions of helpless civilians had been systematically slaughtered in extermination camps that were horrific beyond belief. In which there was still a Soviet Union. In which the Chinese Communists had succeeded, the Korean Peninsula had been permanently divided, thousands of nuclear warheads had spread their deadly threat across the entire Earth, and the Middle East was a festering sore of bloodshed, fanaticism, and terrorism. The knowledge that those false memories had come from somewhere inside his own psyche was terrible, but with the help of Commander Abramowski, a highly decorated Navy fighter pilot who'd been forced to deal with her own PTSD after crippling combat wounds invalidated her out of service, he's put his life back together. With Elzbieta's support, he's learned to deal with the nightmares, to recognize that they are only nightmares that can't-and won't-be permitted to rule his life. Until, that is, a lunatic named Raibert Kaminski knocks on his door one afternoon with an impossible and horrifying story about alternate realities, time travel, temporal knots, and more than a dozen doomed universes which must inevitably die if the temporal storm front rushing towards the distant future isn't stopped. He has to be lying, of course. Or completely insane. But what if he's not a madman after all? What if he's actually telling the truth? That possibility is the most terrifying thing of all. Because if he is, the false memories aren't false after all, and that other world is just as real as the one Schröder has always known. And if that's true, Benjamin Schröder is about to become the greatest mass murderer in human history, because he has to choose. Whether he acts or refuses to act, Benjamin Schröder is the one man who will decide which universe lives and which dies, along with every star system, every galaxy-and every single human being-in it. Including the woman he's discovered he loves more than life itself." -- Provided by publisher. -- Violence, strong language and some descriptions of sex.

DB 119386 [*A quantum love story*](#) by Mike Chen

"The only thing harder than finding someone in a time loop is losing them. Grieving her best friend's recent death, neuroscientist Mariana Pineda's ready to give up everything to start anew. Even her career-

after one last week consulting at a top secret particle accelerator. Except the strangest thing: a man stops her...and claims they've met before. Carter Cho knows who she is, why she's mourning, why she's there. And he needs Mariana to remember everything he's saying. Because time is about to loop. In a flash of energy, it's Monday morning. Again. Together, Mariana and Carter enter an inevitable life, four days at a time, over and over, without permanence except for what they share. With everything resetting-even bank accounts-joy comes in the little: a delicious (and expensive) meal, a tennis match, giving a dog his favorite treat. In some ways, those are all that matter. But just as they figure out this new life, everything changes. Because Carter's memories of the time loop are slowly disappearing. And their only chance at happiness is breaking out of the loop-forever." -- Provided by publisher. -- Strong language. Commercial audiobook.

DB 119987 [The other valley](#) Scott Alexander Howard

One sixteen-year-old Conseil candidate spots two visitors from the future, but is shocked when she recognizes them as the parents of the boy she loves"-- Provided by publisher. -- Unrated. Commercial audiobook.

She finds solace in comic books, drawing her own series, Atomic Anna, and she's determined to make it as an artist. When she meets the volatile, charismatic Viktor, their romance sets her life on a very different course. In the '80s, Raisa, is a lonely teen and math prodigy, until a quiet, handsome boy moves in across the street and an odd old woman shows up claiming to be her biological grandmother. As Raisa finds new issues of Atomic Anna in unexpected places, she notices each comic challenges her to solve equations leading to one impossible conclusion: time travel. And she finally understands what she has to do.
